

Adagene to Participate in Three Upcoming Investor Conferences

August 20, 2026

SAN DIEGO and SUZHOU, China, Aug. 20, 2026 (GLOBE NEWSWIRE) -- Adagene Inc. (Nasdaq: ADAG) a platform-driven, clinical-stage biotechnology company transforming the discovery and development of novel antibody-based therapies, today announced that senior management will participate in three upcoming investor conferences taking place in New York, New York.

2026 Cantor Global Healthcare Conference; New York, NY – September 9-11, 2026

- **Format:** 1x1 Meetings
- **Date/Time:** September 11, 2026

Morgan Stanley 24th Annual Global Healthcare Conference; New York, NY – September 14-16, 2026

- **Format:** Fireside Chat and 1x1 Meetings
- **Fireside Chat Date/Time:** September 15, 2026, 10:45–11:20 AM (Eastern Time)

H.C. Wainwright 28th Annual Global Investment Conference; New York, NY – September 14-16, 2026

- **Format:** Fireside Chat and 1x1 Meetings
- **Fireside Chat Date/Time:** September 16, 2026, 9:00–9:30 AM (Eastern Time)

If you are interested in meeting with Adagene management during the conferences, please reach out to your representative for each respective conference.

Webcasts of the fireside chats will be accessible in the [Investors](#) section of the Company's website at <https://www.adagene.com> for at least 30 days following each of the conferences.

About Adagene

Adagene Inc. (Nasdaq: ADAG) is a platform-driven, clinical-stage biotechnology company committed to transforming the discovery and development of novel antibody-based cancer immunotherapies. Adagene combines computational biology and artificial intelligence to design novel antibodies that address globally unmet patient needs. The company has forged strategic collaborations with reputable global partners that leverage its SAFEbody precision masking technology in multiple approaches at the vanguard of science.

Powered by its proprietary Dynamic Precision Library (DPL) platform, composed of NEObody™, SAFEbody, and POWERbody™ technologies, Adagene's highly differentiated pipeline features novel immunotherapy programs. The company's SAFEbody technology is designed to address safety and tolerability challenges associated with many antibody therapeutics by using precision masking technology to shield the binding domain of the biologic therapy. Through activation in the tumor microenvironment, this allows for tumor-specific targeting of antibodies, while minimizing on-target off-tumor toxicity in healthy tissues.

Adagene's lead clinical program, muzastotug (ADG126), is a masked, anti-CTLA-4 SAFEbody with FDA Fast Track designation that targets a unique epitope of CTLA-4 in regulatory T cells (Tregs) in the tumor microenvironment. Muzastotug is currently in Phase 1b/2 and Phase 2 clinical studies in combination with anti-PD-1 therapy, particularly focused on microsatellite stable (MSS) metastatic colorectal cancer (CRC). Validated by ongoing clinical research, the SAFEbody platform can be applied to a wide variety of antibody-based therapeutic modalities, including Fc empowered antibodies, antibody-drug conjugates, and bi/multi-specific T-cell engagers.

Safe Harbor Statement

This press release contains forward-looking statements, including statements regarding certain clinical results of ADG126, the potential implications of clinical data for patients, and Adagene's advancement of, and anticipated preclinical activities, clinical development, regulatory milestones, and commercialization of its product candidates. Actual results may differ materially from those indicated in the forward-looking statements as a result of various important factors, including but not limited to Adagene's ability to demonstrate the safety and efficacy of its drug candidates; the clinical results for its drug candidates, which may not support further development or regulatory approval; the content and timing of decisions made by the relevant regulatory authorities regarding regulatory approval of Adagene's drug candidates; Adagene's ability to achieve commercial success for its drug candidates, if approved; Adagene's ability to obtain and maintain protection of intellectual property for its technology and drugs; Adagene's reliance on third parties to conduct drug development, manufacturing and other services; Adagene's limited operating history and Adagene's ability to obtain additional funding for operations and to complete the development and commercialization of its drug candidates; Adagene's ability to enter into additional collaboration agreements beyond its existing strategic partnerships or collaborations, and the impact of the COVID-19 pandemic on Adagene's clinical development, commercial and other operations, as well as those risks more fully discussed in the "Risk Factors" section in Adagene's filings with the U.S. Securities and Exchange Commission. All forward-looking statements are based on information currently available to Adagene, and Adagene undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information,

future events or otherwise, except as may be required by law.
